

JENELLE DOBYNS

FRONT END WEB DEVELOPER/D

PROFILE

Innovative and creative web and UI/UX developer with 3+ industry experience designing and developing rich, interactive solutions for web and mobile with a focus on usability, accessibility, brand integrity and user experience design.

EXPERIENCE

Lead Web Developer **Beyond Blue Media** **December 2020 - Present**

- Lead development and design team in following best practices and development standards
- Restructure web processes and procedures for maximized efficiency and organization, cutting project lead times by 2+ weeks and allowing team to take on 20%+ more website projects
- Lead custom development for advanced web projects requiring custom coding in PHP, jQuery Ajax, React, Liquid, advanced SCSS and other languages

Web Developer **Beyond Blue Media** **April 2020 - December 2020**

- *WordPress/WooCommerce, Shopify | JS, PHP, SQL, React | Figma, Adobe Suite*
- Primary developer working with a variety of clients and businesses to create custom web solutions ranging from small personal brands to large e-commerce projects
- Identified client, user, and system requirements for websites and applications and built custom web and mobile solutions based on needs using a variety of CMS services

Student Web Developer **Colorado State University** **May 2019 - May 2020**

- *WordPress | JS, PHP, SQL | Sketch, Adobe Suite*
- Sole developer and main designer of Colorado Water Center main website, an official part of the Colorado State University network with over 1200 unique monthly visitors
- Led site migration into WordPress and redesign to comply with CSU styles while maintaining the integrity of the Water Center vision

SHOWCASE

Map + ACF integration **peacrivercbd.com** **2018**

- *Mapael.js, jQuery, PHP*
- Interactive map component using Mapael library integrated with Advanced Custom Fields to be fully customizable by non-developers

Water Experts Directory **watercenter.colostate.edu** **2019**

- *JavaScript, JQuery, React, HTML5, CSS3, Sass*
- Staff directory developed to elegantly showcase water experts within Colorado State University, with multiple search and sort functions and implementation with GravityForms and GravityView
